## Financial Highlights

### Net sales, operating profit, operating profit margin

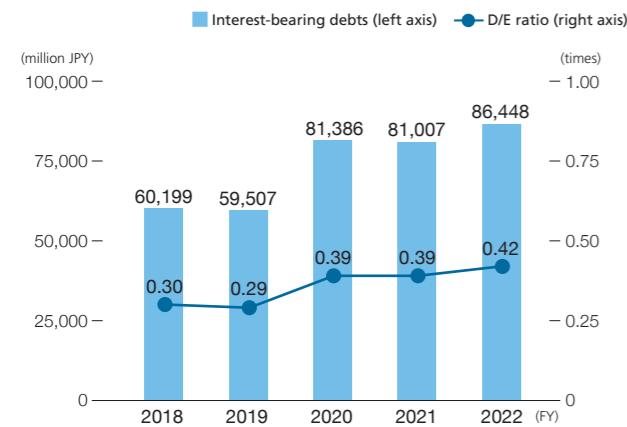

Net sales reached a record high due to the impact of currency fluctuations, but operating profit fell sharply due to soaring raw material prices, rising energy costs, delays in passing on prices, and a deterioration of the electronics market during the second half of the year.

### Cash flows

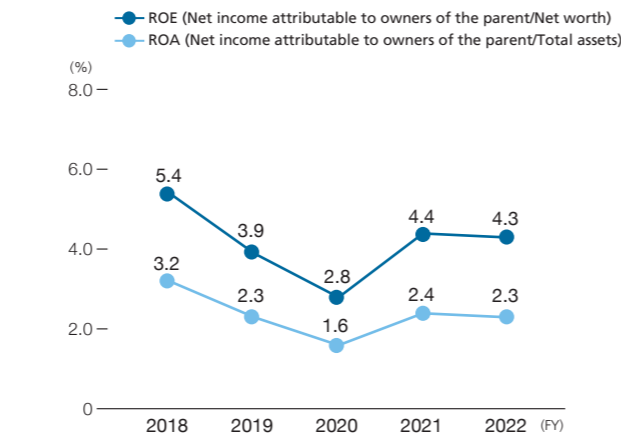

While cash flows from operating activities decreased slightly due to an increase in inventory assets, causing a decrease in cash flows from investing activities, free cash flow amounted to an outflow of 1,383 million JPY.

### Interest-bearing debts, D/E ratio

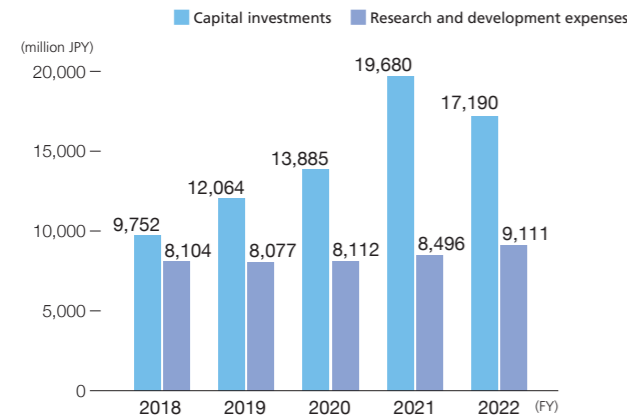

Interest-bearing debts increased by 5,441 million JPY from the end of the previous fiscal year. The D/E ratio has also increased slightly. This increase was due to borrowings such as funds for the construction of new plants overseas.

### ROE, ROA

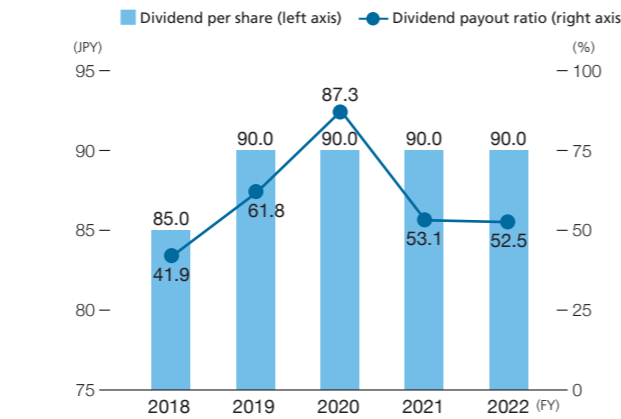

Profit attributable to owners of parent decreased slightly year on year, resulting in lower ROE and ROA than the previous year.

### Capital investments, research and development expenses

In order to create more priority areas of development under Policy (2) of the medium-term management plan, we continued to make investments such as for the creation of a supply system for materials for automotive LiBs, although the total amount of investments was less than in the previous year.

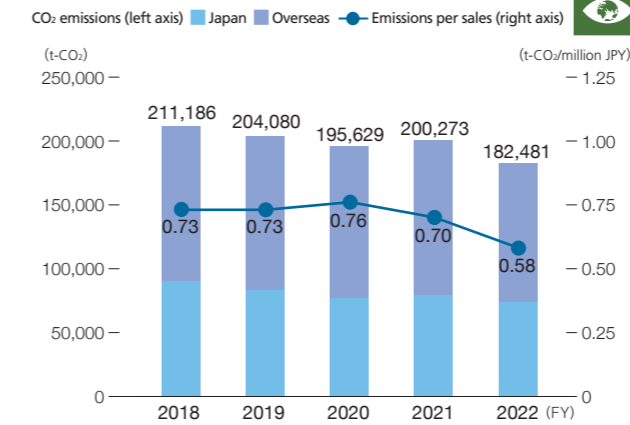

### Dividend per share, dividend payout ratio

Based on our basic policy of continuing to pay stable dividends, we set the minimum dividend amount at 90 JPY per year during the SIC-II period.

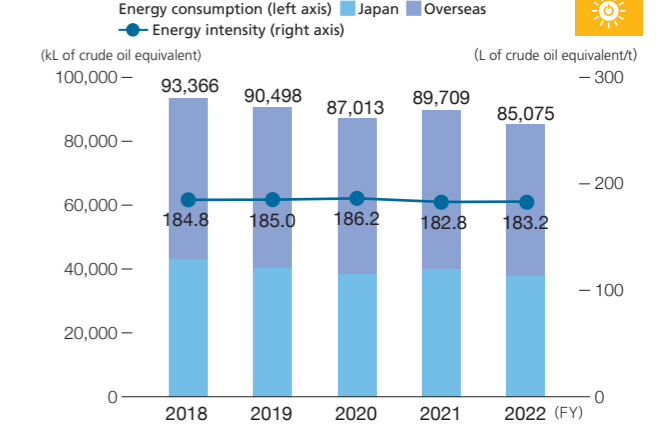

## Non Financial Highlights

### CO2 emissions

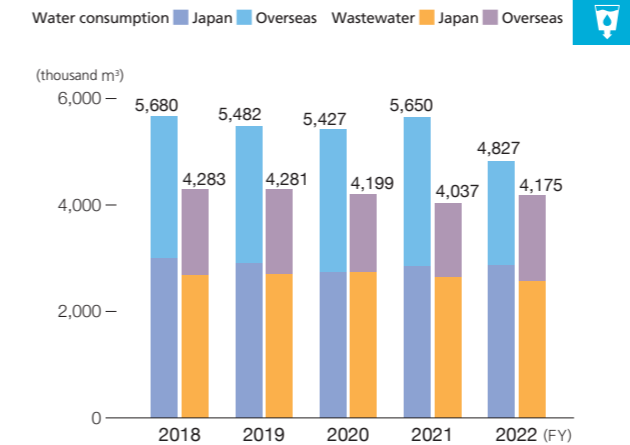

In TSV 2050/2030, we have set the target of reducing total domestic and overseas CO2 emissions to 145,000t-CO2 by FY2030.

### Energy consumption

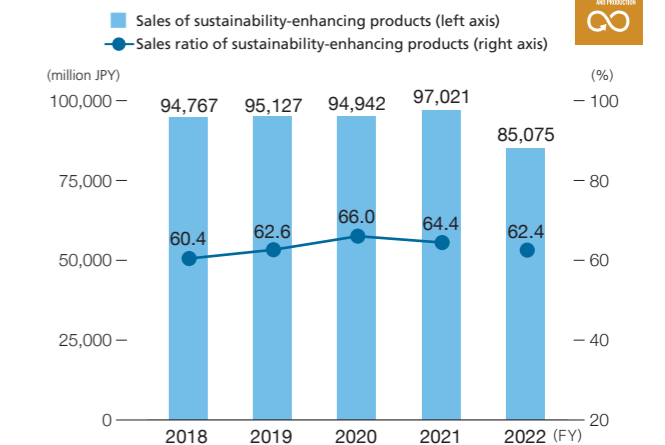

Energy consumption decreased due to a year-on-year decline in production volume, while specific energy consumption (intensity) increased slightly due to a decrease in capacity utilization rates.

### Water consumption and wastewater

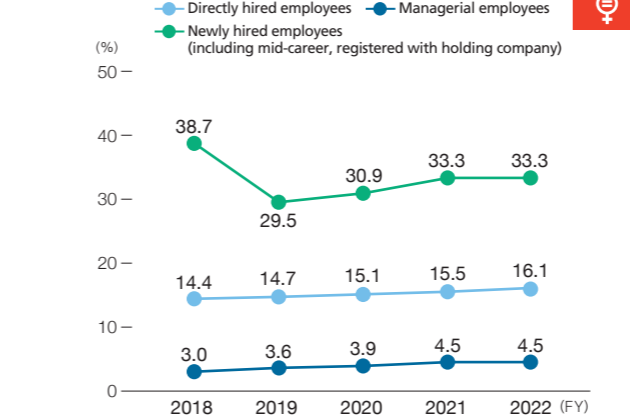

We are striving to reduce the water consumption through measures such as reusing water as process water (reaction solvents, washing water, etc.) after using it as cooling water.

### Sales of sustainability-enhancing products

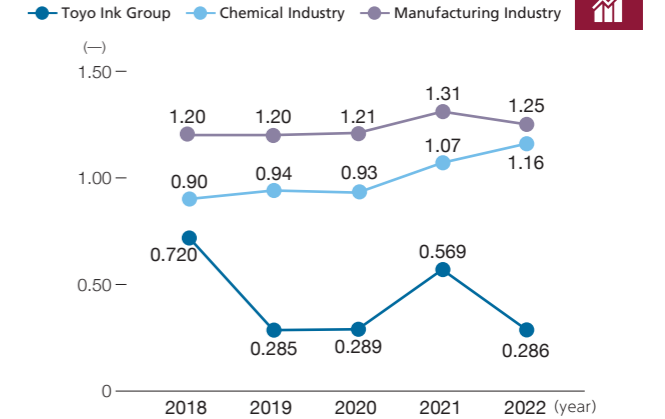

As of fiscal 2022, we have changed the definition of products that contribute to sustainability based on TSV2050/2030 and aggregated sales data accordingly. The values up to fiscal 2021 are net sales and sales composition ratio of conventional environmentally friendly products.

### Percentage of female employees (Japan)

Our Declaration of Active Participation of Women stipulates that the ratio of women among newly hired employees in Japan (including mid-career hires) shall be at least 30%, and that the percentage of female managers shall be at least 8% or higher.

### Lost-workday injury frequency rate (Japan)

In FY2022, there were two lost-workday injuries and the frequency rate decreased from the previous fiscal year, but below that of the chemical industry as a whole, and the manufacturing industry as a whole.

\* The percentage of female employees is calculated as of the end of the fiscal year for directly hired (full-time and part-time) and newly hired employees (including mid-career hires). For managerial employees, it is calculated as of January of the following year.  
\* The frequency rate of accidents requiring time off work is calculated based on the number of accidents requiring time of work by direct employees and temporary employees of the Group. The number of accidents requiring time off work at contractors is not included.
