Create completely solvent-free packaging

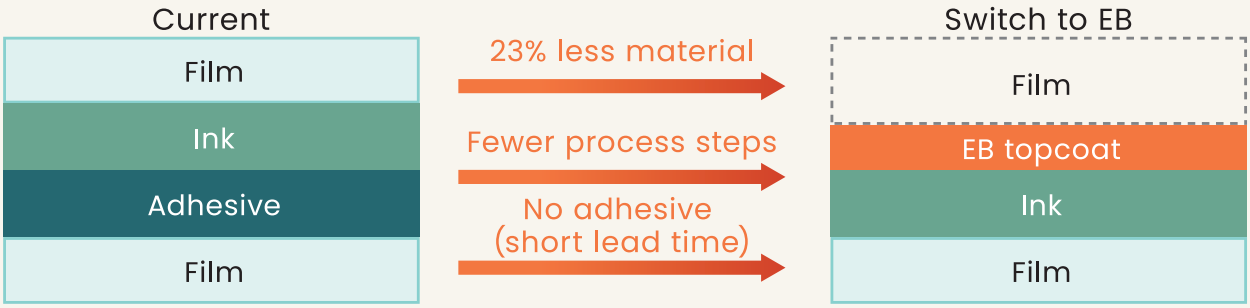

FLASH DRY® EB series
ELEX-ONE® coating

New packaging using EB offset printing and EB topcoat

- **EB topcoat reduces plastic use and improves productivity**
- **EB offset printing enables solvent-free flexible packaging**
- **Sheet-fed EB offset printing system also in development**

EB topcoat

Replace reverse printing with surface printing and a topcoat to reduce plastic

EB offset ink

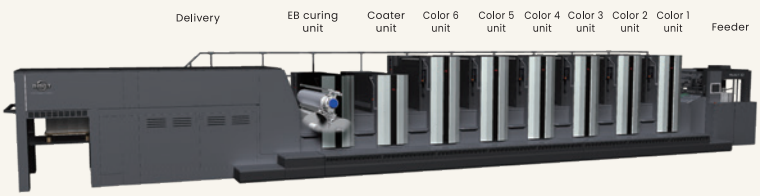

Completely solvent-free; ideal for small to medium flexible-packaging runs

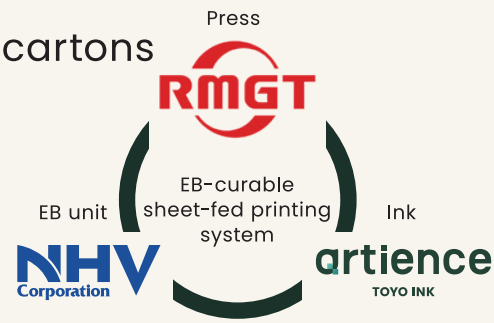

High-energy electron-beam (EB) curing →

- Instant cure
- High-density, high-opacity printing
- Low heat generation
- No solvent or photoinitiator

Sheet-fed EB offset printing system

Suitable for sheet printing, including cartons

artience
